

IMPI WEBINAR SERIES

SPRING 2016

Sponsored by ConAgra Foods

A 3-part series on Food Safety

IMPI Members: FREE of charge

Non-Members: One webinar for \$99; All 3 webinars for \$249

Who should attend?

All those interested in or actively using microwave energy for the heating, analysis or modification of materials. This includes the applications of microwave ovens, industrial processing systems, chemical analysis, etc.

Part 1: Food Safety: A Regulatory Perspective

February 24, 2016, 11am-12pm EST

Instructor: Dr. William K. Shaw, USDA FSIS

- A regulatory overview on the current Food Safety landscape
- Latest updates on the Food Safety Modernization Act and how it impacts microwaveable products
- What, if any, problems is FSIS seeing with NRTE products?

Part 2: Food Safety From A Microbiological Perspective

March 23, 2016, 11am-12pm EST

Developing & Validating Cooking Instructions

Lea Ann Dea, RD, Senior Culinary Product Specialist, ConAgra Foods

Food Safety Considerations for Heating of Foods In Microwaves by Consumers

Stephanie Nguyen, MS, Senior Microbiologist, ConAgra Foods

Part 3: Food Safety & Validation Techniques

April 20, 2016, 11am-12pm EST

Instructor: Judy Lindsey, Business Development Manager, Product Dynamics

- What different techniques are used to ensure food safety?
- What are the food safety considerations during product development?
- Which temperature measurement techniques are employed?
- What is a microbiology challenge tests and why is it important?
- How can Home Use Tests be implemented? Why are they important?
- Are follow up tests on products in retail distribution important? How are they done?
